# Tixel Non-Ablative Aftercare

- Do not apply moisturiser until all heat has gone from the treated areas (2-4hours).
- Serums supplied by the clinic can be applied immediately, and one-two hourly for the first 6 hours, after that the open channels have closed up.
- After 4 hours you can apply Hydrating creme 4x a day, or more as required, until the skin no longer feels dry, (up to 7 days). No active ingredients in moisturiser.
- After 24 hours you can resume your normal skincare regimen. Pat face dry.
- You can apply mineral make-up and SPF after all the heat has gone from the treated area (2-4hours)
- Do Not pick, scratch or rub off micro-crusts, let them come away naturally over the next 7days.
- Any signs of infection or cold sores should be reported to the clinic immediately.

It is important to follow the specific aftercare instructions provided to ensure the best possible healing and results. If you have any questions or concerns about the aftercare process, be sure to ask your practitioner for more guidance.
